

Coronavirus disease (COVID-19)

Situation Report – 122

Data as received by WHO from national authorities by 10:00 CEST, 21 May 2020

Highlights

[The WHO World Health Assembly has ended with a global commitment to the COVID-19 response.](#) Delegates adopted a [landmark resolution](#) to bring the world together to fight the COVID-19 pandemic.

[WHO has been supporting Somalia since the beginning of this outbreak](#) to enhance its infection control measures, testing capacities, and case management. In particular, training has been provided for the healthcare workers of the De-Martino hospital and 13 other isolation centres across the country, which have also received medical supplies and budget support for salaries. However, so far, only 26% of WHO's urgent appeal of US\$ 21.95 million for emergency response to COVID-19 in Somalia has been funded.

The [World Day for Cultural Diversity for Dialogue and Development](#), celebrated every year on 21 May, is an opportunity to celebrate not only the richness of the world's cultures, but also the importance of cultural competency and intercultural dialogue within healthcare systems. It also reminds us that public health efforts against the COVID-19 pandemic require a whole-of-society approach and must include vulnerable populations such as refugees and migrants in national plans and strategies.

Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

Globally	4 893 186 cases (103 981)	323 256 deaths (4 467)
Africa	68 347 cases (2 391)	1 910 deaths (64)
Americas	2 166 003 cases (60 333)	128 649 deaths (2 806)
Eastern Mediterranean	376 379 cases (14 477)	10 468 deaths (165)
Europe	1 946 610 cases (17 811)	170 283 deaths (1 250)
South-East Asia	164 225 cases (8 014)	5 140 deaths (169)
Western Pacific	170 910 cases (955)	6 793 deaths (13)

Surveillance

Figure 1. Number of confirmed COVID-19 cases reported in the last seven days by country, territory or area, 15 May to 21 May**

**See Annex 1 for data, table and figure notes.

Figure 2. Number of confirmed COVID-19 cases, by date of report and WHO region, 30 December 2019 through 21 May 2020**

**See [Annex 1](#) for data, table and figure notes.

Table 1. Countries, territories or areas with reported laboratory-confirmed COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 21 May 2020**

Case definitions

WHO periodically updates the [Global Surveillance for human infection with coronavirus disease \(COVID-19\)](#) document which includes surveillance definitions.

Definition of COVID-19 death

COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID-19 disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Further guidance for certification and classification (coding) of COVID-19 as cause of death is available [here](#).

Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented, with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

^[1] All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

Counts reflect laboratory-confirmed cases and deaths, based on [WHO case definitions](#), unless stated otherwise (see *Country, territory, or area-specific updates and errata*), and include both domestic and repatriated cases.

Other*: includes cases reported from an international conveyance (Diamond Princess).

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as *negative* numbers in the "new cases" / "new deaths" columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days, graphics will be updated accordingly. Prior situation reports will not be edited; see covid19.who.int for the most up-to-date data.

Additional table notes

ⁱ Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis, may be revised as new information becomes available, and are based on the highest category reported. Differing degrees of transmission may be present within countries/territories/areas. Categories:

- No cases: with no confirmed cases
- Sporadic cases: with one or more cases, imported or locally detected.
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures.
- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area.
- Pending: transmission classification has not been reported to WHO.

ⁱⁱ "Territories" include territories, areas, overseas dependencies and other jurisdictions of similar status.

Country, territory, or area-specific updates and errata

- Update 21 May 2020, United Kingdom: Counts adjusted retrospectively by national authorities due to data reclassification: 525 cases were excluded.
