

# Coronavirus disease (COVID-19)

## Situation Report – 195

Data as received by WHO from national authorities by 10:00 CEST, 2 August 2020

### Highlights

[WHO has published a COVID-19 Preparedness and Response Progress Report](#). The report highlights the progress made from 1 February to 30 June 2020 under the three objectives outlined in the Strategic Response and Reparedness Plan: scaling up international coordination and support, scaling up country preparedness and response by pillar and accelerating research and innovation. The report also discusses some of the key challenges faced, and provides an update on the resource requirements for the next phase of WHO's response.

A new report by the Economic Commission for Latin America and the Caribbean, and the WHO Regional Office for the Americas has highlighted that economies in the Region will only be revived if the COVID-19 curve is flattened. [The report highlights that convergence and coordination between health, economic, social and productive policies are required in order to control the COVID-19 pandemic](#).

[A team of Russian laboratory experts is providing support to Tajikistan's COVID-19 response](#). The team from Rospotrebnadzor, Russian Federation, an active member of the Global Outbreak Alert and Response Network, will assess Tajikistan's existing laboratory system, including the flow of information, and suggest steps to strengthen the COVID-19 laboratory data management system.

### Situation in numbers (by WHO Region)

Total (new cases in last 24 hours)

<b>Globally</b>	17 660 523 cases (262 929)	680 894 deaths (5 851)
<b>Africa</b>	802 792 cases (14 344)	13 779 deaths (234)
<b>Americas</b>	9 476 763 cases (156 433)	359 180 deaths (3 963)
<b>Eastern Mediterranean</b>	1 554 065 cases (9 071)	40 386 deaths (367)
<b>Europe</b>	3 375 535 cases (17 419)	213 284 deaths (323)
<b>South-East Asia</b>	2 131 165 cases (58 971)	45 837 deaths (937)
<b>Western Pacific</b>	319 462 cases (6 691)	8 415 deaths (27)

# Surveillance

Figure 1. Number of confirmed\* COVID-19 cases reported in the last seven days by country, territory or area, 27 July to 2 August \*\*

\*\*See [Annex 1](#) for data, table and figure notes.

Figure 2. Number of confirmed COVID-19 cases, by date of report and WHO region, 30 December through 2 August\*\*

\*\*See [Annex 1](#) for data, table and figure notes.

Table 1. Countries, territories or areas with reported laboratory-confirmed\* COVID-19 cases and deaths, by WHO region. Data as of 10 AM CEST, 2 August 2020\*\*

Reporting Country/Territory/Area	Total confirmed* cases	Total confirmed* new cases	Total deaths	Total new deaths	Transmission classification <sup>i</sup>	Days since last reported case

## Case definitions

WHO periodically updates the [Global Surveillance for human infection with coronavirus disease \(COVID-19\)](#) document which includes surveillance definitions.

### Definition of COVID-19 death

A COVID-19 death is defined for surveillance purposes as a death resulting from a clinically compatible illness in a probable or confirmed COVID-19 case, unless there is a clear alternative cause of death that cannot be related to COVID-19 disease (e.g. trauma). There should be no period of complete recovery between the illness and death.

Further guidance for certification and classification (coding) of COVID-19 as cause of death is available [here](#) and [here](#).

---

## Annex 1: Data, table and figure notes

Caution must be taken when interpreting all data presented. Differences are to be expected between information products published by WHO, national public health authorities, and other sources using different inclusion criteria and different data cut-off times. While steps are taken to ensure accuracy and reliability, all data are subject to continuous verification and change. Case detection, definitions, testing strategies, reporting practice, and lag times differ between countries/territories/areas. These factors, amongst others, influence the counts presented, with variable underestimation of true case and death counts, and variable delays to reflecting these data at global level.

The designations employed, and the presentation of these materials do not imply the expression of any opinion whatsoever on the part of WHO concerning the legal status of any country, territory or area or of its authorities, or concerning the delimitation of its frontiers or boundaries. Dotted and dashed lines on maps represent approximate border lines for which there may not yet be full agreement. Countries, territories and areas are arranged under the administering WHO region.

The mention of specific companies or of certain manufacturers' products does not imply that they are endorsed or recommended by WHO in preference to others of a similar nature that are not mentioned. Errors and omissions excepted, the names of proprietary products are distinguished by initial capital letters.

<sup>[1]</sup> All references to Kosovo should be understood to be in the context of the United Nations Security Council resolution 1244 (1999). In the map, number of cases of Serbia and Kosovo (UNSCR 1244, 1999) have been aggregated for visualization purposes.

\*A small number of countries/territories/areas report combined probable and laboratory-confirmed cases; efforts are underway to identify these for notation in the data table.<sup>†</sup>Other: includes cases reported from international conveyances.

Due to the recent trend of countries conducting data reconciliation exercises which remove large numbers of cases or deaths from their total counts, WHO will now display such data as negative numbers in the "new cases" / "new deaths" columns as appropriate. This will aid readers in identifying when such adjustments occur. When additional details become available that allow the subtractions to be suitably apportioned to previous days, graphics will be updated accordingly. Prior situation reports will not be edited; see [covid19.who.int](https://covid19.who.int) for the most up-to-date data.

### Additional table notes

<sup>i</sup> Transmission classification is based on a process of country/territory/area self-reporting. Classifications are reviewed on a weekly basis and may be revised as new information

becomes available. Differing degrees of transmission may be present within countries/territories/areas; classification is based on the highest category reported within a country/territory/area. Categories:

- No cases: with no confirmed cases;
- Sporadic cases: with one or more cases, imported or locally detected;
- Clusters of cases: experiencing cases, clustered in time, geographic location and/or by common exposures;
- Community transmission: experiencing larger outbreaks of local transmission defined through an assessment of factors including, but not limited to: large numbers of cases not linkable to transmission chains; large numbers of cases from sentinel lab surveillance; and/or multiple unrelated clusters in several areas of the country/territory/area;
- Pending: transmission classification has not been reported to WHO.

ii “Territories” include territories, areas, overseas dependencies and other jurisdictions of similar status.

#### **Country, territory, or area-specific notes, updates and errata**

- **Update 2 August 2020, Belgium:** Counts adjusted retrospectively by national authorities: case and death counts adjusted for 28 July to 1 August.
- **Update 2 August 2020, Andorra:** Counts adjusted retrospectively by national authorities: case and death counts adjusted for 3 March to 1 April, 28 to 30 April and on 1 August.
